General Description of the Programme -

This programme is for use by the Anzdata Registry for data entry purposes through the collection of Screens and for access in analysing the data through the enclosed Tables, as described in the Data Dictionary, using the Structured Query Language (SQL). This data is available for distribution to participating units or for approved research purposes via an ASCII comma delimited file.

New fields and amendments have been added to the Tables and data entry screens as at DECEMBER 2006. These have been linked and tested and have produced a working programme for the Anzdata Registry.
