General Description of the Programme -

This programme is for use by the ORGAN DONATION REGISTRY for data entry purposes through the collection of Screens, and access to analysing the data through the enclosed Tables, as described in the Data Dictionary, using the Structured Query Language (SQL).

Screens for data entry have been redesigned where new fields have been added.

The alteration of fields in various Tables for the ORGAN DONATION REGISTRY Database Programme includes testing and linking these modifications and additions with the existing Database requirements to produce a working programme.
