

## **Parent Hospitals - Transplanting Hospitals - Satellite Haemodialysis Units**

[Victoria](#)

[New South Wales](#)

[South Australia](#)

[Tasmania](#)

[Queensland](#)

[Australian Capital Territory \(ACT\)](#)

[Western Australia](#)

[Northern Territory](#)

[New Zealand](#)

The definition of a 'parent hospital' is a pragmatic one, and refers to units which offer a full range of dialysis services (i.e. can commence patients on dialysis, have on-site nephrologist presence and can deal with patients of all degrees of complexity). In contrast, satellite units (provide haemodialysis treatments to selected patients, usually with lower staff ratios and no on-site nephrologist. In some cases, hospitals have combined as part of a regional network and this is also indicated.
