

# What's New in ANZDATA Collection

## Transplant Assessment Pathway

### Executive Summary

In response to the Transplantation Society of Australia and New Zealand's (TSANZ) Performance Report, "Improving Access to and Outcomes of Kidney Transplantation for Aboriginal and Torres Strait Islander People in Australia", the Australian Government established a National Indigenous Kidney Transplantation Taskforce (NIKTT) in July 2019.

In collaboration with ANZDATA, enhanced data collection and reporting was implemented within the Online Electronic Data Collection tool (<https://services.anzdata.org.au>) and as Paper Collection Forms (**Transplant Assessment Stage - Form TA** and **Transplant Assessment Pathway - Form TP**)

To participate in the enhanced data collection and reporting pilot, please contact the Registry. For those participating, please refer to the NIKTT Data Project Guidance Document for more information on this data collection.

### Data Element

The end of year survey ('**Transplant Assessment Stage**') will be collected as an extension of the normal ANZDATA Annual Survey. Participating sites will be required to report on the current waitlisting status for all prevalent dialysis patients at 31 December 2019 and again at 31 December 2020. This will require sites to report on whether the patient is yet to be assessed for transplantation, in workup for transplantation, on the waiting list, or ineligible for transplantation (and the reason why).

The second component involves the real time reporting of incident dialysis patients during 2020 ('**Transplant Assessment Pathway**'). Sites will be required to report on patient's progress towards achieving kidney transplant waitlisting, including their history of undertaking eligibility assessment, workup and transplant assessment.

### Collection of Data Element

Below illustrates where the element is located on the online system screen and or paper forms:

## Appendix D: NIKTT End of Year Survey Form TA

The Registry sends out paper forms at end of survey. For participating units the Form TA is required to be completed and then securely returned to the ANZDATA Registry with the other annual survey forms. Below is an example of Form TA.
