## Purpose:

This document provides codes and descriptions for those fields within the ANZOD data entry web application and the associated ANZOD paper based data collection form.

Codes and descriptions coincide with the 2014 introduction of the national Electronic Donor Record (EDR) system.

Electronic versions of this document and the ANZOD paper data collection form can be located at our website at the following address:-

<http://www.anzdata.org.au/anzod/v1/dataforms.html>

## Background:

The ANZOD Registry records and reports on a wide range of statistics that relate to organ donation following death within Australia and New Zealand. Currently all data comes to the registry as hard copy and is data-entered by registry staff.

From early 2014, Australian data will be entered into the national Electronic Donor Record (EDR) system and sent to the registry using web services. New Zealand data will either be entered directly into the ANZOD registry by facility staff (donor coordinators) or will come as a hard copy and be entered by ANZDATA registry staff.

All manually entered data is first stored in the ANZOD staging area. Once it's been submitted and passed validation it will move into the actual ANZOD database tables. Records transferred from EDR will also be stored in the ANZOD staging area for manual review and intervention.

**\*\*For the interim period between the start of 2014 and the roll out of the EDR system, all Australian data will be recorded using the 2014 ANZOD paper form.\*\***

Updated 2014 Definition:-

#### **Actual Organ Donor -**

An organ donor is a person for whom the organ retrieval procedure commenced in the operating room (with surgical incision) for the purpose of transplantation. This includes donors who may have been deemed medically unsuitable during surgery or after the removal of organs.

#### **Intended Organ Donor -**

An intended organ donor is a person for whom the donation work was initiated as evidenced by both:

- 1) Formal written consent undertaken, including consent for donation of specific organ+/-tissues, and
- 2) Blood for tissue typing sent with allocation of a donor number;

but donation did not proceed.
