

CHAPTER 2

Prevalence of Renal Replacement Therapy for End Stage Kidney Disease

Summarising the number of prevalent renal replacement therapy patients in Australia and New Zealand, the prevalence rate per million population and the demographics and clinical characteristics of prevalent patients.

All Renal Replacement Therapy Modalities

Table 2.1 shows the number of prevalent patients treated with renal replacement therapy in Australia and New Zealand over the last 20 years. The prevalence rate per million population (ppm) is also shown. The prevalence of renal replacement therapy continues to grow in both countries, however, the prevalence rate (ppm) for patients treated with dialysis fell in 2016 in both Australia and New Zealand. Table 2.2 shows the same data for the last 5 years, but with dialysis modality categorised.

Table 2.1 Prevalence (ppm) of Renal Replacement Therapy 1997-2016

Year	Australia			New Zealand		
	Dialysis	Transplant	Total	Dialysis	Transplant	Total
1997	5187 (282)	4737 (257)	9924 (539)	1017 (269)	876 (232)	1893 (501)
1998	5535 (297)	4966 (267)	10501 (564)	1126 (295)	929 (244)	2055 (539)
1999	6017 (320)	5137 (273)	11154 (593)	1230 (321)	976 (254)	2206 (575)

Table 2.3 and figures 2.1-2.2 show the 2016 prevalence (ppm) of RRT by age groups. In both countries the modal age group was 55-64, although the highest prevalence rates were in the 65-74 year-old group in New Zealand and

the 75-84 year old group in Australia. The prevalence in the 75-84 and 85+ age groups was substantially higher in Australia than in New Zealand.

Table 2.3 Prevalence (pmp) of Renal Replacement Therapy by Age 2016

Age	Australia	New Zealand
0-4	46 (29)	8 (26)
5-14	166 (56)	34 (55)
15-24	485 (153)	102 (153)

Table 2.4 shows the prevalence (pmp) of RRT by state over 2012-2016. In Australia at the end of 2016 the Northern Territory had the highest prevalence of dialysis patients and Tasmania the lowest; the ACT had the highest prevalence of transplant patients and Western Australia the lowest.

Table 2.4 Prevalence (pmp) of Renal Replacement Therapy by State 2012-2016

Modality	State	2012	2013	2014	2015	2016

Figure 2.3 shows the overall distribution of RRT modality by country at the end of 2016. The dialysis modalities are shown separately in figure 2.4. A substantially higher proportion of New Zealand dialysis patients receive dialysis at home (either PD or home HD) than in Australia. A higher proportion of patients on renal replacement therapy in Australia have a functioning renal transplant than in New Zealand.

Figure 2.3 - RRT Modality by Country - 2016

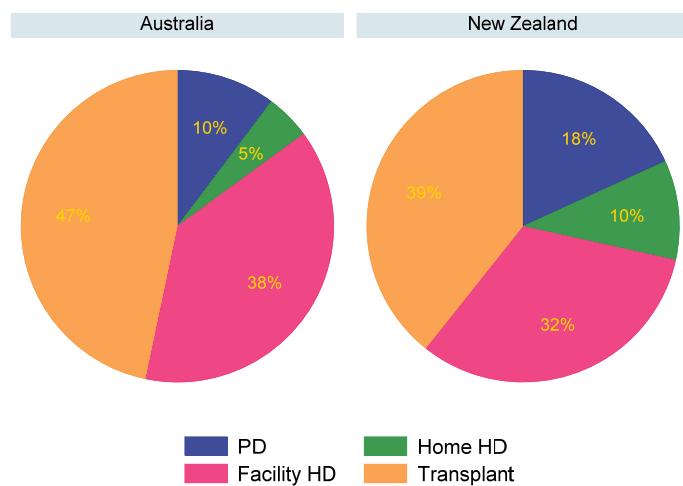

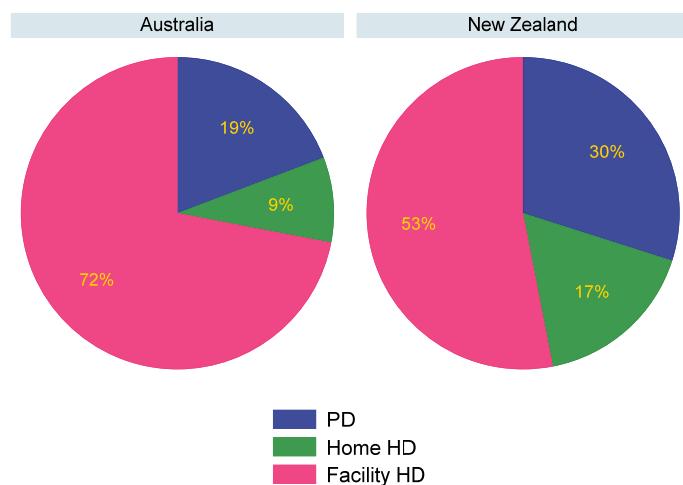

Figure 2.4 - Dialysis Modality by Country - 2016

Figures 2.5 and 2.6 show the same data by state. There was substantial variation in the types of RRT received between states; in particular, in the Northern Territory the large majority of patients were receiving satellite HD.

Figure 2.5 - RRT Modality by State - at End of 2016

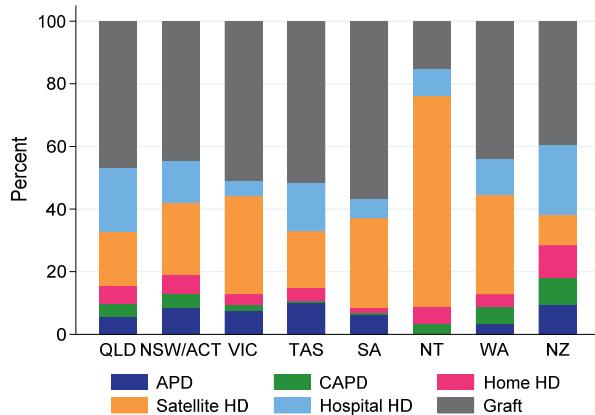

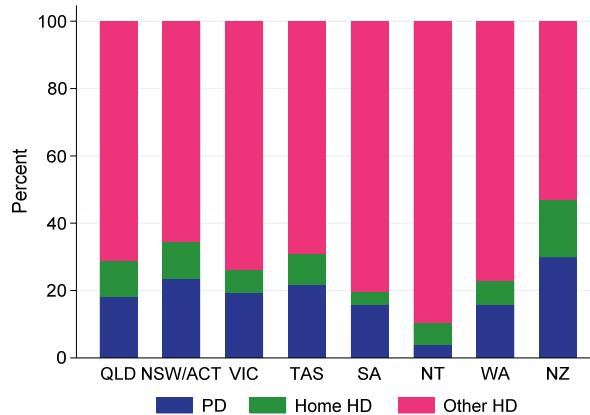

Figure 2.6 - Dialysis Modality by State - at End of 2016

Dialysis

Table 2.6 and figures 2.7-2.8 show the age distribution of prevalent dialysis patients in 2016. The dialysis population in New Zealand is slightly younger than that of Australia.

Table 2.6 Dialysis Prevalence (pmp) by Age - 2016

Age	Australia	New Zealand
0-4	27 (17)	4 (13)
5-14	25 (8)	8 (13)
15-24	138 (44)	51 (76)
25-34	450 (126)	152 (239)
35-44	924 (286)	285 (491)
45-54	1879 (596)	505 (795)
55-64	2674 (958)	733 (1325)
65-74	3241 (1556)	713 (1768)
75-84	2757 (2473)	276 (1302)
85+	591 (1219)	23 (277)

Figure 2.7.1 - Prevalent Dialysis Patient Numbers - Australia - 31 December 2016

	HD	Total	1696	1763	1867	1909	1927

Co-morbidities

Figure 2.10 shows trends in the prevalence of co-morbidities (with 95% CIs) in prevalent RRT patients over the last 10 years. In general, the rates of these co-morbidities appear to be falling over time, with the exception of lung disease in New Zealand.

Figure 2.11 shows the prevalence of diabetes. Although the majority of prevalent RRT patients are non-diabetic, there is a strong trend in both countries towards a higher percentage of patients with type II diabetes.

Figure 2.10.1 - Comorbid conditions at end of year - Australia
