<b>VERSION</b>	-	VERSION 8.1.5.00
<b>FORMS</b>	-	VERSION 6.0.5.0.2

### **General Description of the Programme -**

This programme is for use by the Anzdata Registry for data entry purposes through the collection of Screens and for access in analysing the data through the enclosed Tables, as described in the Data Dictionary, using the Structured Query Language (SQL). This data is available for distribution to participating units or for approved research purposes via an ASCII file.

This programme is Oracle Version 8i with the Java Option running on a Windows NT Version 4 operating system. The migration to this current version of Oracle has ensured Year 2000 compliance.

Screens for data entry have been redesigned together with the addition of new fields and amendments to the Tables. These have been linked and tested and have produced a working programme for the Anzdata Registry for the years to come.
