

# What's New in ANZDATA Data Collection

## Change to Treatment Codes (Convention and Quotidian data no longer being collected)

### Executive Summary

ANZDATA will no longer be collecting quotidian or conventional dialysis. As a result, codes BC, BQ, DC, DQ, FC, FQ, YC, YQ will cease. When registering patients or changing patient dialysis treatments a single letter code B, D, F, Y is available.

The ANZDATA Advisory Committee and Haemodialysis Working Group agreed to this change in data collection element. The new data variable is available in real time within the Online Electronic Data Collection tool (<https://services.anzdata.org.au>) and the A3 Survey Paper Form from Survey 73 - 2022

### Background

The Registry has been collecting conventional and quotidian data since 2011 survey. This historically required a 2 letter code in treatments for validation with the dialysis screen and analysis.

### Data Element

Data is collected in real-time. Historical use of the quotidian and conventional codes will remain within the patient's treatment record. The following codes will apply going forward:

- B – Hospital HD
- D – Satellite HD
- F – Home HD
- Y – HD Community House

### Collection of Data Element

Figure 1 – Paper Form

COURSE OF TREATMENT COMPLETE ACCORDING TO CODE	SEQ	CODE	DAY	MTH	YR	REASON
E APD / IPD	1	E	31	05	2021	
M GAPS	2	G	03	11	2021	
B Hospital HD	3					
D Satellite HD	4					
F Home HD	5					
Y HD Community House	6					
G Transplant in Home	7					
H Date of last post graft dialysis	8					
X Transplant Overseas	9					
T Graft function ceased-Temporary	10					
P Graft function ceased-Permanent	11					
J Own kidney function recovered. Dialysis ceased	12					
K Date of last visit if lost to follow up	13					
W Withdrawal from Dialysis	14					
Z Date of Death	15
